“The Safe, Natural, Easy to Use Patch - Good for pain relief too”

WHY USE FOUNTAINHEAD HEAT DETOX PATCHES TO CREATE HEAT

The Fountainhead Heat Detox patches do not need to be kneaded or shaken prior to use. They are thin, lightweight and easy to wear anytime of the day or night and heat up naturally ie no drugs being absorbed by the body and thus good for people who have suffer from high blood pressure, kidney disease, gastro-intestinal bleeding and people that are generally sensitive to other pain relief methods.

The Fountainhead Heat Detox Patches are designed to gradually heat for a long time by using internationally patented microcapsules of warming pigment. This product greatly improves blood circulation due to generation of Far Infrared Ray emitting anions. After using this product for an extended period of time, physical constitution of the human body may be changed.

Heat opens up the blood vessels which allows more oxygen and nutrients to reach the tissues and toxins to be released allowing greater healing to take place.

Fountainhead Heat Detox patches are recommended for:

- people who experience coldness of the feet or hands even in ordinary weather
- back pain, general body pain
- pain in the abdomen (ie menstrual, cystitis, colic)
- stiff neck and shoulder pain
- pain of the ankles and joints
- pain in hands, wrists and feet
- sports injuries, muscular aches and pains
- people who don't mind heat on feet and want to detox quicker through feet

The Fountainhead Heat Detox Patches Contain Active Ingredients of:

1) Microcapsule

This is the container which contains the warming agents of the foot patches.

2) Tourmaline

Tourmaline is best known as one of the only minerals to emit far infrared heat. It creates a resonance in the body that vibrates at the same frequency as water. Tourmaline exerts a cleansing energy on our nervous system. This has a stabilizing and cleansing effect.

Infrared Tourmaline is the only mineral to show permanent electricity on the earth and is also a natural (non-manufactured) source of negative ions and far infrared (FIR) rays.

Far infrared rays naturally generate heat by causing the body's molecules to rapidly vibrate against each other.

When **Far infrared rays** penetrate the skin, they come into contact with protein, collagen and fats, By stimulating micro-vibrations far infra-red cause a thermal reaction which elevates tissue temperatures. The

When **Far infrared rays** penetrate the skin, they come into contact with protein, collagen and fats, By stimulating micro-vibrations far infra-red cause a thermal reaction which elevates tissue temperatures. The human body then reacts by dilating all the blood vessels regardless of size. Tissues are revitalized because of the improved (micro & macro) circulation.

It should be noted that an important principle of traditional Chinese medicine is that good blood circulation promotes good health. Conversely, an obstructed blood flow will increase the likelihood of disease and pain.

Infra-red therapy has proven to be effective because its "hot rays" exhibit analgesic, anti-inflammatory and anti-spasmodic capabilities. Therefore the far infrared produced by Heat Detox patches may be useful in the treatment of sub-acute or chronic inflammations, and for trauma, scar adhesions and nerve pain.

3) Organic Agaricus Semotus

Beta-glucan and Polysacchides contained in the Agaricus mushroom are known as one of the most powerful enhancing agents for the immune system. AAO certification proves the quality of our special Agricus mushroom. These organic mushrooms are naturally grown under powerful sunlight in the fertile red clay of Brazil without any artificial agents. Beta Glucans is known as a potent factor in natural cancer control. It is a steroid that has been used to assist in the regulation of cancer cells and is exceptional source of vitamins, minerals and amino acids.

4)Eucalyptus Oil

It exhibits exceptional permeability and sterilizing properties it infiltrates, absorbs, detoxifies, and sterilizes. The Eucalyptus is probably the most powerful antiseptic in its class as ozone is formed upon exposure to air.

5) Mugwort Extract

Used in **protection and restoration of the liver and intestine**, as a digestive aid and treats nervousness and insomnia; protection of eyesight; prophylactic in chemotherapy, suppression of carcinogenic substances, extinction of cancer cells; suppression of cholesterol; strengthening of blood pressure; action of immunity; removal of fever; and assists in women's diseases.

6) Loquat Extract

The Loquat leaf contains malic acid, tartaric acid, citric acid, tannate, carotene, vitamins A, B and C. It's leaves and kernel contain amygdalin (amygdalin is otherwise known as vitamin B17, or laetrile). It promotes the secretion of body fluids and has antitussive, expectorant, antiemetic properties. It has 3000 years of history in moxibustion therapies and has been used extensively in Buddhist medicine. In India it has been called the king of herbal medicine.

7) Vitamin C

Vitamin C has properties that help prevent oxidization in metabolic processes of the human body and boosts the immune system functions of cells.

8) Chitosan

This comes from Chitin which is contained in Hokkaido crab (red sea king crab). Well known for weight-loss and isolating fatty tissue and dispelling it out of the body safely. This is a water-soluble, natural and high molecular substance to which has good characteristics of moisture-keeping, excellent membrane-forming and skin-protecting ability.

9) Starch

This water-soluble substance is used to absorb excess moisture from the patch. As this component causes synergism for each component, their efficacies may be improved greatly.

10) Warming Pigment

The heating element of Heat Detox patches. After being pasted on the body or the bottom of the feet, it stimulates meridians, acupuncture points and promotes greater blood flow.

11) Heat Storing Polysaccharide

A heating agent which also contains properties to keep the patches warm.

The Patches Can Be Applied On Most Any Part Of The Body

The Fountainhead Heat Detox Patches pull toxins out through the skin – Alleviate aches and pains – Improve blood circulation – Improve blood cleansing – Reduce swelling in body – Detox whilst sleeping – Improves quality of sleep – Provides a visual confirmation of detox – Made from potent all natural ingredients.
